-Company Information:

Corporate Telecom is a business ISP that is dedicated to advancing your company by focusing on your Telecom Business needs, from voice and data such as PRI/SIP trunks, cloud based VoIP and hosted PBX to managed services, routers and so much more. With a highly experienced and dedicated team of professionals whose expertise ranges from network design, security engineering and monitoring services, you can rest assured knowing that all of your high speed internet services are being thoroughly and expertly designed and monitored.

-Working with Corporate Telecom:

Based out of Manfred, Florida and providing the highest quality customer service with a local presence 24/7, Corporate Telecom is there when you need us. Privately owned and operated since 1998 and dedicated to providing the best telecommunication services on the market, Corporate Telecom is trusted by some of the largest, high-profile companies to keep them up and running. Sony Pictures, Buzzfeed and Sunset Gower Studios are just a few of the industry specific leaders that have made the switch to one of the fastest growing, most dedicated and highly professional telecommunication and ISP businesses in Florida.

- About our team:

Corporate Telecom prides itself on hiring only the most professional, hard working and dedicated individuals to make sure that your company is always in good hands. Not only are we Florida local, we're Florida family. We believe that by seeking out the best and most qualified professionals and welcoming them into our growing family that you, our customer, will be provided with the highest quality, most skilled and trusted telecommunications engineers in the field. You can rest assured knowing that your ISP, voice and data services will be in the hands of the talented professionals that we trust with our business as well.

- About our infrastructure:

Here at Corporate Telecom, we have created a company based on the diverse needs and various aspects of your business. We use the Cisco ASR 1000 Series Aggregation Service Routers to provide you with the best, high end, proficient internet services that Florida has to offer. These routers provide a borderless network architecture and run off of the highly advanced Cisco Quantum Flow Processor with integrated threat and defense systems to protect you and your business. These routers provide companies that require high-performance, high-bandwidth services with capacity headroom to operate proficiently, while ensuring top of the line WAN services, embedded WAN edge security, reduced and optimized operating costs and only the best traffic management capabilities. From data, voice and managed services, we guarantee that you will be met with the highest quality in standards.

Data

- Ethernet over Copper - The latest and fastest growing service for providing high speed internet and bandwidth.
- T1, Bonded T1 & T3
- Ethernet over Fiber
- Multi Protocol Layer Switching - Built and designed by Corporate Telecom, MPLS is a new technology that allows you to design fast, efficient and scalable IP networks for businesses with multiple offices that need to share high priority, sensitive data securely.
- Colocation
